Lovely Professional University

Phagwara, Punjab (India)

Name : Rupesh Kumar Mishra

Course : Advance Web Development

Reg No. :11703157

Submitted to : **Miss Neha Sharma**

## Project : Covid19india Tracker

Github Link : <https://github.com/rupeshinventor/covid19india>

Working link: <https://rupeshinventor.github.io/covid19india/>

Overview :

This project help to check number of recoveries and number of diseased, number of total cases in the form of a table as the form of graph of each state of india. There were I have used node js for Backend and used hawkins university API to call the data. use this table to track the change in the number of COVID-19 cases in your state/UT.

\*↑ symbol denotes an increase in the number of cases over the last 24 hours. The Progression shows how the number of active cases has changed over a while.
